## Make This A Banner Year for Raymond

### Junior Literary Club Organized

A juniors Literary Dickens Club was organized under the direction of Mrs. Helen Orgill last Friday, Dec. 28th. The purpose of this organization is to help the younger children (boys and girls) of Raymond, to appreciate the works of Dickens and others of the masters of good literature.

The procedure of this meeting was, first an election, the outcome of which was:

President: Robert Wood.  
Vice-President: Betty Leavitt.

Sec. Treas: Steele Brewerton.  
Betty Leavitt was appointed Chairman of the Refreshment Committee, to pick her own aids.

There were nineteen present, and we hope to see more prospective members out at the next meeting.

This was followed by a book review given by Mrs. M. Rayo Woolf on Dickens "Christmas Carol," which was very interesting.

It was decided to have this Club meet every two weeks, the next meeting being at Mrs. T. Geo. Wood's on Jan. 9, 4 p.m.

—Reported by Robt. Wood.

### L. D. KING HOME FROM CONVENTION

L. D. King, local Ford dealer, of the sales and service staff of the dealership, returned home on the 28th of Dec. from Calgary, where he attended the special review of the new Ford V-8 cars for 1935, held for Ford dealers and their associates in the Alberta territory on December 27th.

Mr. King attended the confidential preview of the new Ford Motor Company of Canada Ltd. branch building in Calgary.

During the meeting they heard Henry Ford, Edsel Ford, President Wallace R. Campbell of the Ford Motor Company of Canada, Ltd., and others of the Ford Motor Company address the entire Ford organization in Canada and the United States over an international telephone hook-up which extended from New York to San Francisco and from Minneapolis to Houston in the United States, and from Vancouver to Saint John in Canada. They also witnessed motion pictures of the new Ford cars, and discussed the Ford sales campaign for 1935.

The meeting was in advance of the first public showing of the new Ford V-8, set for Saturday, December 29th.

### Late Oil Well News

Thursday morning the Franco Oil Well at Cardston was down 1,586 feet, in the same formation encountered when drilling was suspended just before Xmas. Prospects are still very bright and the official analysis of the last showing sent to the Government exceeded the hopes of the Directors of the well, and there expectations were very high.

The fact that the well has been following so closely the geology of Dr. Hintze, is one great cause for optimism and great hopes. Almost to the foot as the drill has descended, it has encountered the formations set out on the map of the field, drawn by Dr. Hintze when the well was first located.

Things are apt to happen any hour at the well, and the boys are all keyed up to fever pitch and expecting anything anytime. If you want to get the fever just make a visit to the well and talk with the boys awhile, and feel the optimism that is prevalent there.

### 1935 CALENDAR WELL ARRANGED FOR WEEK ENDS

With Holidays Throughout  
Year: Fall on Fridays or Monday.

For the "week-enders" that carefree crew who betake themselves into the country and along the highways and byways when a holiday presents itself, the 1935 calendar has joyful news. Practically all the public holidays this year fall on a Monday. The remainder, starting with Good Friday, April 19, fall on Friday, a survey of the calendar reveals.

May 24 falls on Friday, June 3 the King's birthday, is on a Monday. So is Dominion Day, Labor Day, Sept. 2, is, of course, a Monday, Thanksgiving Day is Monday, October 14, and Remembrance Day, November 11, is also a Monday.

Christmas Day, 1935, which after all is only about 355 days away, will fall on Wednesday.

Some schools reopened on Wednesday, Jan. 2nd. Our local schools however left the students free until Thursday morning Jan. 3rd.

### Jacks Defeat Sunburst 50-17

Before a good crowd last Saturday night, the Idlers and the Union Jacks both won their games in the opening Exhibit ion games of the present season.

Playing with the Stirling Giants, now coached by Solon Low, our former townsman, and High School Coach, the Idlers found tough opposition, and a decided improvement in team work, and the Stirling lads held the balance of power at the end of the first half, with a score of 13-14.

The Idlers however, found themselves in the second stanza and started rolling in the counters, with the result that the final whistle found the score 37-23 for the Idlers.

The lineup was Stirling—Proctor, Christensen, Zaugg, Young, Selk, Clark, Seely, A. Zaugg and Hartley.

Idlers—Webster, Kirkham, Meeks, King, Hague, Card, Woolley and Harker.

#### JACKS SUNBURST

The Jacks showed rare form and wonderful team work in the game against the Texaco All Stars from Sunburst, Mon., and rolled up a score of 17 points before the visitors found the hemp at all. Both teams opened up carefully but it was not many minutes before the Jacks started breaking away and peeling the hoop with counters, which necessitated time out for the visitors while the game was still in its infancy.

#### IF YOU WANT TO BE LOVED

Don't contradict people, even if you are sure you are right.

Don't be inquisitive about the affairs of even your most intimate friend.

Don't under-rate anything because you don't possess it.

Don't believe that everybody else is happier than you.

Don't conclude that you never had any opportunities in life.

Don't believe all the evil you hear.

Don't repeat gossip, even if it does interest a crowd.

Don't jeer at anybody's religious belief.

Learn to hide your aches and pains under a pleasant smile.

Few care whether you have an ache, headache or rheumatism.

Learn to attend to your business—a very important point.

Do not try to be anything else but a gentleman or gentlewoman; and that means one who has consideration for the whole world, and whose life is governed by the golden rule. — Ex.

#### DID YOU EVER STOP TO THINK?

(By Edson R. Waite, Shawnee)

JAMES E. BARRETT, MANAGING DIRECTOR OF THE OKLAHOMA BILTMORE HOTEL, IN OKLAHOMA CITY, SAYS:

"City-builders must have initiative."

"The greatest forces behind progress is initiative."

"Initiative is the power to see and start something worthwhile."

"Where initiative is used cities are built."

"Where initiative is killed, the building of a city ceases."

"The man who has initiative and civic pride is a great asset to any city."

"Some business men should realize that time spent in civil work is time spent on important work for their business."

SPEND ALL THEIR TIME MAKING MONEY AND SPENDING IT.

NO NO TIME BOOSTING THE HOME CITY. THE HOME CITY SLOWS UP AND SO DOES BUSINESS."

### Gymnasium Course Being Offered

#### News Notes

G. W. and D. W. Mendenhall were business visitors in Lethbridge on Thursday.

John S. Smith, Wm. Hagerty and J. T. Dunn of the Franco Oils Field Staff were Raymond visitors on Thursday.

The chinook on Thursday was very welcome. It was the warmest day in the past three weeks, since the cold weather set in.

Geo. Brewerton was rather under the weather the first part of the week, but is feeling better now.

G. W. Mendenhall, father of Deal arrived from Springville, Utah, on Wednesday evening for a visit with his son and friends here.

We will have quite a stretch now without a public holiday, the next one being Good Friday, which this year comes on April the 19th, and Easter on the 21st.

After 10 days of unrelenting cold the wind switched to the west Monday, and while not chinooking very much was much warmer than the previous week had been.

By Mutual agreement, business houses of the town remained closed on Wednesday following New Year's day, so that we had four holidays in the past two weeks.

The hauling of siloed beets from this district is rapidly nearing the finish and if roads remain open there will not be many ton left when the end of this week comes.

Skating is going on now at the rink with good ice. The cold spell permitted the caretaker to get a good sheet of ice fixed up. The old swimming hole also furnishes skating for some of the kids.

The Grehound didn't get here until 2 p.m. from Cardston on Wednesday because of the badly drifted roads. Sixteen cars were stuck in the drifts in less than two miles distance.

Chas. Asplund returned to the U.I.D. Wednesday after spending New Year's at home here. He got into one drift this side of Cardston a few miles and was an hour getting out.

O. H. Snow held the lucky ticket that won the new Radio at the Capitol last Monday night New Year's Eve. The Radio went on the first draw of the evening.

The local bakery started delivering the new 20 ounce loaf Thursday morning to local stores. The new and larger loaf is sold for 25c. Really it is the bread a little cleaner before, because of the larger loaf.

Phil Baker and Mayor W. G. Meeks report a wonderful and interesting trip on their big game hunt in the wilds south and west of Edmonton, declaring it to be the best big game country they have ever been in. They expect to return again next year.

Through an arrangement with the local Rotary Club and the Athletic Association, a Gym Course for the younger boys and young men of the town is now being offered, at the low price of 25 cents a month, which will include one lesson a week of one hour's duration.

According to present plans the ages will run from 9 to 18 in four different classes, and the Rotary sponsors hope to enroll one hundred boys. Now parents think it over, and give your boy a chance. Those who witnessed the Circus put on here by the Lethbridge Club last year, can appreciate what athletic training will do for the young, and it was largely because of this that the present effort has been made to offer training to our boys.

Bills, containing full particulars have been put out, and everyone interested is urged to get one of these bills, read the details, and then get busy and get your boy enrolled in one of these classes. It will help us all.

### "AS EARTH TURNS," PICTURE MADE FROM BEST SELLER, COMING

Gladys Hasty Carroll's record smashing novel, "As The Earth Turns," which has been dramatized for the screen by Warner Bros., comes to the Capitol theatre next Monday for a 2 day engagement.

This sage of New England rural life, the first novel by Miss Carroll, has taken such an astounding grip on popular fancy that it has broken all records by that it has broken all records of American life, has been dramatized by Ernest Pascal, himself an author of note, and should prove to be a powerful and dynamic picture.

The characterizations have been wonderfully and realistically drawn from the lives of the rugged New England pioneer types and are said to be portrayed by an unusual cast, each member of which was carefully selected because of his or her peculiar fitness for the part.

Jean Muir, the tall stately blonde former stage player, who has recently leaped to leading picture roles, has the feminine lead of Jen, a farmer's daughter who loves the soil that has nurtured her and whose strong sense of values holds even her love life in check until the man she cares for has demonstrated his own deep affection for the good earth.

### Wedding Bells

JOHANSON — BLACKBOURNE

The wedding took place quietly at St. Andrew's Presbyterian Manse on Friday afternoon last, December 28, 1934, of Miss Helen Blackbourne of Lethbridge to Dr. Avid Johanson of Raymond. They were attended by Miss Jean Blackbourne and Mr. Lorne Blackbourne, sister and brother of the bride, with Rev. J. N. Hepburn officiating. Dr. and Mrs. Johanson will reside here, where the Doctor is practising.

Raymond welcomes the new-laws, and extends best wishes for a long and happy married life.

### News Notes

This is the time of year a lot of cheques, receipts, etc. are spoiled with the wrong date being stated.

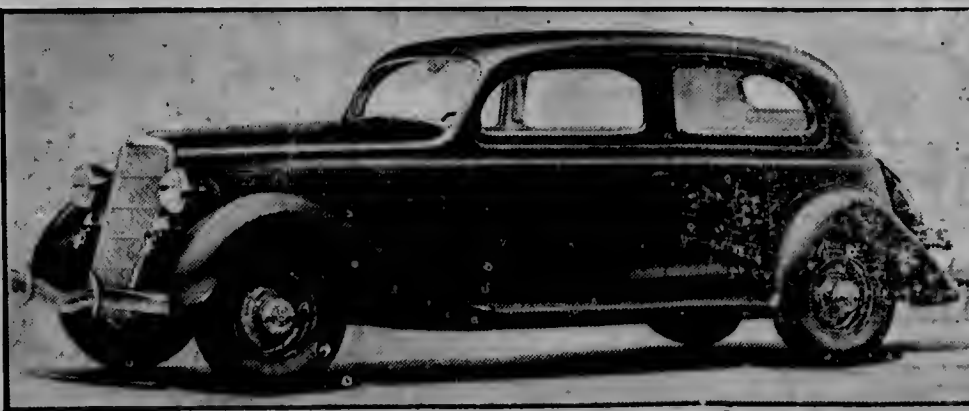

Mr. and Mrs. Jas. Hamling and Mr. and Mrs. Kinkell Anderson sent New Year's evening with Mr. and Mrs. S. I. May.

Parley Palmer of Barnwell spent New Year's here with his son-in-law and daughter, Mr. and Mrs. Henry G. G. G.

Prisoners meeting was held last week, but the cold weather cut down the usual good attendance.

Mr. and Mrs. Dohlin Bennett sent New Year's with Mrs. Bennett's parents in Cardston, returning home Wednesday.

### New Body Lines and More Room in 1935 Ford V-8

THE largest and roomiest cars Ford has ever built, with new body lines of advanced streamline design, are illustrated above in this Ford V-8 de luxe Tudor sedan for 1935. Sedans seat six passengers in comfort. Luxurious appointments are new. The eleven body types are all finished in new baked enamel which is said to need only washing to restore its high lustre. Cars are approximately eight inches longer from bumper to bumper and seats are wider. Chassis improvements, including moving the engine forward more than eight inches and new spring suspension, add to riding comfort, especially of rear seat passengers. Directed-flow crankcase ventilation is an improvement of the 90 horsepower V-8 engine.

### IN THE NEW YEAR

Now we have a brand New Year. What are we to do with it? There is no doubt but what we can make it just about what we desire, either a decided success or a very marked failure.

Let us talk about our town. What can we do as individuals and collectively to make it a better town during 1935. In the first place we need more cooperation. There is absolutely no denying this fact. Generally speaking, we are all so blamed busy, trying to feather our own nests, that we have no time nor inclination to inquire how our competitor is faring. And, in our little game of dog and cat, we get so busy guarding our own home, that the outside world is away with the wind, and we blame everyone but ourselves for it. It seems about the only thing we can co-operate on is holding on a holiday.

Further than that it is the duty of each man for himself and the devil for us all. With so many merchants and tradesmen in our midst as we have, we should be able to work for each other's interests either through a merchants and tradesmen's association or through some other organization.

Then too, many of us are too busy with our own affairs to devote any time to active participation in the Board of Trade, Town Council, School Board or our other public bodies, but we have never seen anyone too busy yet to criticize and find fault when things are not carried out as they want them to be. There are numerous questions continually arising in all of these public bodies that demand great wisdom in making decisions, and yet, because of our individual selfishness, we pass the buck to others, possibly inferior in judgment and experience, and then criticize their efforts at solving these problems, every qualified citizen should consider it his duty to support these public bodies with his financial and moral support, and if asked, should devote at least one or two or three terms to the Council or School Board to acquire a more extended knowledge of the affairs of his or her town, and to have his appreciation increased for the men and women who are serving on these public bodies.

Over the week-end we listened to several radio broadcasts of services in various churches and the theme seemed to be, 'You cannot stand still, you cannot be neutral, you are either for or against,' and this thought could be carried into our church, our home, our town club, or anything else with which we are associated. We are either boosting and helping build, or we are knocking and helping to undermine the efforts of someone else. Face yourself squarely and determine which side of the fence you are on. You dislike anyone knocking you. Be sure you do

not knock your fellowman. You dislike anyone knocking your church be charitable enough not to knock the other fellows. And if you dislike having your town knocked, then be sure you do not set the example by finding fault with the town and the men who have charge of its affairs.

Don't rare over backwards when you read this. If you are not guilty of any of these charges, then pat yourself on the back, kiss your loved ones good bye and prepare to meet St. Peter. You're too good to be in such a sinful place anyway. We are guilty of most of these weaknesses to a greater or lesser degree, and that is likely why it is so easy for us to talk about them.

However in 1935, we are going to try and do more for our town and community and the business men and women who make it up, and as a result we are going to expect our friends and neighbors to do more for us. When we all decide to make this the best town in Alberta of any town its size, then our roads, sidewalks and all other public improvements will grow by leaps and bounds and we will be the best town. So long as we live unto ourselves, we will not be very much better than we are now, because it will be impossible for those who have our affairs in hand to make us any better. Have you ever thought of it from that angle.

Don't forget to write it 1935

Chemist (showing new assistant round shop): "That bottle Oh, that's the medicine we give customers whose prescriptions are illegible."

### DID YOU EVER STOP TO THINK?

By Edson R. Waite  
SHAWNEE, OKLA.

Nothing is more conducive to the continuous growth of a business than continuous advertising.

It's the everlasting hurry of a lot of automobile drivers that causes so many accidents. A lot of them with nothing but time are always trying to see how quickly they can get there.

My friend James E. Barrett, managing director of the Oklahoma Biltmore Hotel in Oklahoma City, says that citizenship confers obligations and responsibilities upon all. Some citizens have not awakened to that fact. It is time they put their shoulders to the wheel and help their home city forge ahead.

The advertisements in your local newspaper are a "Parade of Quality." Get the habit of reading them carefully. You can save by so doing.

It doesn't pay to rest on your oars too long.

Cheap prices for cheap goods advertised in cheap handbills make no appeal to those who want true value for their money. People who want quality goods at reasonable prices read the advertisements in the home town newspaper before they shop. They believe in safety first.

The political business is the biggest business in the United States today.

All business men should practice what they preach and buy at home.

Farmer's Wife: "We really ought to make our milk go twice as far as it does."

Farmer: "Yes, where there's a will, there's a way."

"With modern girls dressing and acting like men it's no wonder people get confused."

"That's right, why only this morning I got a letter addressed 'Dear Sir or Madam.'"

# FORD V-8 FOR 1935

The New Ford V-8 for 1935 is the biggest and roomiest Ford car ever built. It is a strikingly handsome car, with modern lines and new, luxurious appointments.

But most important of all it is especially designed to give you smooth, easy riding over all kinds of roads—"a front-seat ride for back-seat riders."

This ease of riding is achieved by the use of three basic principles never before combined in a low-price car.

1. Correct distribution of car weight by moving engine and body forward eight and a half inches.

2. New location of seats by which the rear seat is moved forward, toward the centre of the car away from the rear axle and away from the bumps.

3. New spring suspension which permits the use of longer, more flexible springs and increases the springbase to 123 inches.

**A New Ford V-8 That Brings New Beauty, New Safety, and a New Kind of Riding Comfort Within Reach of Millions of People**

The result is Centre-Poise—which not only gives you a new riding comfort but adds to the stability of the car and its ease of handling. You can take curves from seven to eight miles faster with perfect safety.

There are many new features in the Ford V-8 for 1935 which make the car still easier to drive. New brakes give more power for stopping quickly with far less foot pressure on the pedal. A new type of easy-pressure clutch employs centrifugal force to increase efficiency at higher speeds. New steering mechanism makes the car still easier to handle.

The New Ford V-8 for 1935 retains the V-8 engine which has demonstrated its

dependability and economy in the service of over a million owners. There are refinements, but no change in basic design. You buy premium performance when you buy this Ford V-8—full 90 horsepower and 85 miles an hour.

We invite you to see this New Ford V-8 at the showrooms of Ford dealers. You will want to ride in it—to drive it yourself. You will find it a new experience in motoring.

## Ford V-8 Prices Are Low

11 BODY TYPES—Coupe (5 windows), \$645; Tudor Sedan, \$665; Fordor Sedan, \$750; DE LUKE—Roadster (with rumble seat), \$715; Coupe (3 windows), \$720; Phaeton, \$725; Tudor Sedan, \$730; Cabriolet (with rumble seat), \$815; Fordor Sedan, \$810. TOURING SEDANS, with built-in trunk—Tudor Touring Sedan, \$750; Fordor Touring Sedan, \$830.

**BE SURE TO SEE THE NEW FORD V-8 1½-TON AND 2-TON HEAVY-DUTY TRUCKS . . . AND THE NEW COMMERCIAL CARS**

## IMPORTANCE OF DAIRY PRODUCTS

Modern science is responsible for the addition of ten years to the average span of life, and foremost in that creditable accomplishment may be placed the knowledge of the untrifling value of foods. In other words, to live long one must understand the close relationship of well-balanced meals to bodily health. In this dairy products, such as milk, cheese, butter, and ice cream play an important part. Milk is known as the food for which there is no substitute. Its body-building materials are of the highest quality. Its fat is easily digested; it is the best source of lime (calcium) and contains a liberal amount of phosphorus—the two minerals so necessary for the development of bones and teeth. Like milk, cheese—of which much has been said during the past few weeks particularly during the recent National Cheese Week—is an economical, healthful food. Its high food value is supported by the fact that a pound and a quarter of cheese contains fully as much protein (body-building) calcium, and phosphorus as a gallon of whole milk. Butter is also highly nutritive, containing vitamins which place it first among the fats, and, if those nutritive qualities of butter were as much appreciated as its flavor, there would be still greater consumption of butter in Canadian homes. Cream from which butter is made, and ice cream are likewise very important, not only for their palatability but for their contribution to health.

## HONEY IN THE HOME

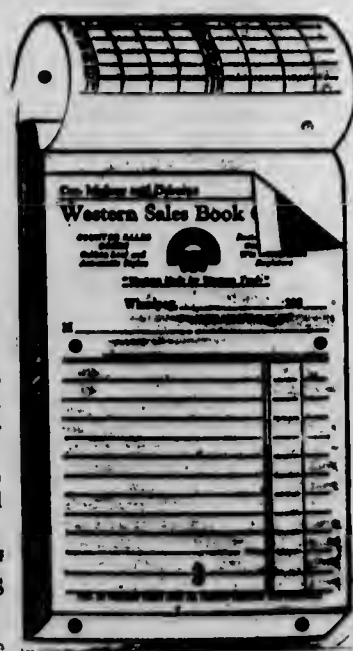

So many household foods keep best in the refrigerator or icebox that the housekeeper may be pardoned for the common mistake of keeping honey there also. The cold of the refrigerator may cause the honey to become cloudy and crystallize, but because honey contains sugar chiefly it does not spoil readily. As a matter of fact, honey keeps best in a warm, dry place, like the pantry shelf, for instance, if tightly closed, it can be kept almost indefinitely at ordinary room temperature. At the same time it should never be stored in a cellar or other likely damp place unless the container is firmly sealed, because it will absorb moisture and ferment, just as any other sugar syrup will. All Canadian honey granulates sooner or later, depending largely upon the proportion of the two invert sugars—levulose (fruit sugar) and dextrose (grape sugar)—it contains. The greater the proportion of fruit sugar to grape sugar, the longer will the honey remain in liquid form. Contrary to general opinion, granulation is not an indication of adulteration but is rather a sign of purity. Granulated honey can be brought back to its liquid form by standing the container in water and heating it to 150 degrees Fahrenheit. A higher temperature than that is likely to darken the colour of the honey and drive off aroma and flavour.

## COMMERCIAL FEED STUFFS

It is a trite saying that the

quality of milk, butter, eggs, beef, bacon, dressed poultry, and other animal products depends on the quality of the feeding stuffs given to the animals concerned, and it is here that modern industry has stepped in to increase the value of these feeds and to convert hitherto waste materials into saleable products. Industry has called in the aid of science and has employed technical and engineering skill in processing materials to retain for animals the maximum feed value or potency. Every kind and age of animal has its peculiar feed requirements, hence, firms manufacture thirty or more different feeds. There are feeds for baby chicks

growing chickens, and fattening chickens; feeds for hens, turkeys, ducks, and pigeons feed for cattle, horses, pigs, and sheep; complete feeds to supplement and balance farm-grown grains feeds for winter and feeds for summer; in short, feeds for all needs. As a guide and protection to feeders, and to protect honest industrial enterprise against unscrupulous competition manufacturers are required by law to label these feeds with the guaranteed chemical composition and ingredients, and these guarantees are checked by officers of the Seed Branch of the Dominion Department of Agriculture.

## EXPERIMENTAL STATION, LETHBRIDGE

## WEEKLY LETTER A SUGGESTED RESOLUTION FOR 1935

"Resolved that in the year 1935 I will not plant a pound of seed of any kind that has not been properly cleaned."

To farmers who have not yet completed their list of New Year's resolutions, or to those who have not considered the question of preparing their seed, we would strongly recommend the above for their most serious consideration.

When prices of farm crops are comparatively low in order that the years operations may be carried on at a profit, it is most important that good yields be obtained and that the product marketed be of superior quality. In order to obtain these results one of the first precautions to take is to provide good seed of a suitable variety. Too often the farming mill is not put into action until shortly before seeding when there is so much pressure from other farm work that the cleaning of seed grain receives less attention than it could have been given had the work been done during the winter months.

In 1931 the Lethbridge Experimental station established a storage elevator for the grain of the station. A monitor farming mill, an Emerson wild oats cleaner, and a French grader were installed for the purpose of

cleaning the grain of the station and as much grain for farmers adjoining the station as time will permit. The amount of cleaning work done for farmers has increased tremendously each year, but there is always a strong tendency on the part of many farmers to postpone the cleaning of their grain until the months of March and April. At that season of the year, on account of making preparations for the next season's field work it is much less convenient for the station to do custom cleaning. Farmers, therefore, who wish to avail themselves of the services of the station for the cleaning of their grain, are strongly urged to apply for this service during the months of January and February.

The charges for cleaning grain particularly only cover the cost and for the sake of convenience the station accepts grain instead of cash, at the rate of 2½ lbs. per 100 pounds cleaned, provided it is suitable for feeding purposes. On and after the first of March the rate for cleaning is double what they are for January and February, and custom cleaning is discontinued as soon as field work commences.

Stores in Raymond closed Tuesday and Wednesday, Jan. 1st and 2nd.

W. J. Kraft, Safeway Supervisor for Southern Alberta, was a Raymond visitor Saturday.

Cora, to Jake: "Dear Jake—Come on Christmas Eve. Pop is at home but is laid up with a sore foot.—Cora."

Jake, to Cora: "I can't come on Christmas Eve. I am laid up on account of your papa's sore foot.—Jake."

Pat met his friend Malone one day, and during the course of a chat, informed him that he was seriously thinking of practicing economy. Some weeks later Malone met him again and asked how his saving stunt was progressing.

"Sure, now," said Pat disgustedly, "it didn't work at all, at all. Hadn't I just got the old mare down to one straw a day when she took it into her head to die."

## COVER CROPS FOR SOIL DRIFTING CONTROL

(Experimental Farms Note)

Cover crops, such as wheat and oats, may be used as a measure of control in districts where fallows are subject to drifting. Perhaps the main objections to their use are that they reduce moisture and hinder weed control, and because seedling is generally recommended about the middle of August when other preparations are under way for the regular grain harvest. On the other hand, wherever used they have been found very beneficial.

At the Dominion Experimental Farm to Indian Head, cover crops have been under observation for a number of years. It has been observed that July seeding is a little early and conducive to excessive growth, however, it provides succulent pasture for livestock in the late fall. Observations this year would indicate the advisability of seeding cover crops in strips fifteen to twenty rods wide running north and south. Stripping reduces operation costs and quite fully protects the fallow from very serious drifting.

When seeding cover crops use the same variety of wheat and oats intended for seeding the following spring. This is very important especially from the standpoint of registered or certified seed production. One-half bushel of wheat or three-quarters of a bushel per acre of oats have given good results.

W. H. Gibson,  
Dominion Experimental Farm,  
Indian Head, Sask.

## Here and There

Canadian Pacific liner Empress of Britain, flagship of the fleet of the company, sails January 10, from New York on its fourth round-the-world cruise, visiting 32 ports in 120 days. Return to New York is scheduled for May 20, 1935. More than 31,000 miles will be covered by the ship on this cruise. This is Canadian Pacific's twelfth annual world cruise.

Four years old and still breaking records, the 25,000-ton Empress of Japan, newest and biggest of the Canadian Pacific Steamships Pacific fleet, made the run, Honolulu to Yokohama in six days, 16 hours, 53 minutes, putting the ship in possession of speed supremacy for all legs of the Pacific crossing.

R. Cornthwaite, fireman, Canadian Pacific Railway, Engineer James V. Ross and Yrdrmau J. Murphy, Port Arthur, aboard yard engine "6608" pulling 150 empty cars from Port Arthur to Port William, saw a woman lay her head on the rails just ahead of the engine. Cornthwaite leapt through the cab window and from the front floor board jumped just in time to drag the woman clear of the track.

Miss Georgia Englehart, slim girl Alpinist of New York, this summer climbed Mount Assiniboine, highest peak in the Canadian Rockies, and in doing so completed her 100th ascent in the Banff-Lake Louise area. Two years ago she set a new woman's endurance championship by scaling 28 peaks in a single summer in that section.

Low winter fares good from December 15 to February 23 are being offered by the railways covering round trips to Canada's Evergreen Playground, that favored region in British Columbia called Vancouver Island, with the beautiful capital of the province, Victoria, and all the sports attractions of summer available during the winter months brought within the purse limits of the average Canadian.

The big event of 1935 will be the pageantry and picturesque functions of the 25th anniversary of King George's accession to the throne, set for May 6 next, which will continue until well into July. Summer railings of Canadian Pacific there have been planned to connect with these events.

The Laurentians, Eastern Canada's winter playground, face the biggest season in their history with an ambitious programme of ski events calling for 19 meets of various kinds, not counting the Dominion and International Inter-collegiate championships extending from January 1 to April 27. It is announced by the Laurentian Zone committee of the Canadian Amateur Ski Association.

Recommendation of immediate implementation of the heavy construction report for professional ranks of the Civil Service of Canada was unanimously concurred in at a business session of the Professional Institute of the Civil Service held recently at Ottawa.

### New Model

#### Fords Announced

The new Ford V-8 for 1935  
presenting a new conception of  
beauty and comfort in the mod-  
ern automobile, was announced  
today by King Motors, local  
Ford dealer.

Most striking feature of the  
new car is body lines which are  
distinctly modern and a defi-  
nite departure from any pre-  
vious Ford design. The new cars  
are approximately eight inches  
longer from bumper to bumper.  
Seats are as much as 5½ inches  
wider, and front seat leg room  
has been increased.

The car also embodies a com-  
bination of major engineering  
developments aimed at increas-  
ing riding comfort — which  
has been called the "center-  
poise" ride. These changes in-  
clude moving the engine for-  
ward more than eight inches  
over the front axle, a longer  
front spring placed four inches  
forward, a straight instead of  
bowed rear spring, and a total  
"springbase" of 123 inches on  
the chassis of 112 inches wheel-  
base. The frame is placed low-  
er, and 6.00 by 16-inch tires  
carrying less air pressure are  
fitted. There are four double-  
acting hydraulic shock absorb-  
ers. Passengers sit inside the  
wheelbase. The rear tread of  
the car is more than two inches  
wider.

Numerous chassis changes to  
give greater ease of control  
and added stability on the road  
have been made. Cross-steering  
a stiffer frame, a new clutch re-  
quiring less pedal pressure, and  
new brakes calling for less ef-  
fort to operate, all contribute  
to these results.

Two improvements have been  
made in the Ford V-8 engine,  
of which more than 1,300,000  
are on the road. Directed-flow  
crankcase ventilation removes  
water vapor and other fumes  
from the engine. Aircraft type  
connecting rod bearings of a  
copper-lead material used pre-  
viously only on airplane engines,  
truck engines and expensive

### Notice re Dairy Cows

This is to certify that I have  
tested the cows now being used  
by the Hancock Dairy and have  
found them in good health and  
FREE from T.B.

G. R. BREWSTER,  
Veterinary Surgeon.

This notice is inserted in the  
paper to contradict reports  
that have been carried to some  
of my customers, and others,  
regarding the health of my  
dairy herd.

C. E. HANCOCK

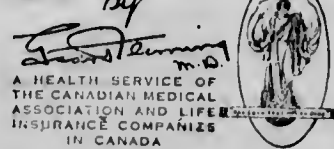

custom-built automobiles, are  
fitted.

One new type of body is pre-  
sented, the touring sedan, with  
unusually sleek lines and en-  
bodying a fitted rear trunk  
compartment integral with the  
body. There are eleven body  
types listed. The following are  
available with de luxe equip-  
ment: Phaeton, roadster, 3 wind  
ow coupe, cabriolet, Tudor sed-  
an, Fordor sedan, Tudor tour-  
ing sedan, Fordor touring sed-  
an. The roadster and cabriolet  
A 5 window coupe and the  
have rumble seats.

Tudor and Fordor sedans are  
available without de luxe equip-  
ment.

All models are finished in a  
new baked enamel which is claimed  
to retain its high gloss  
indefinitely, requiring only  
washing to restore the lustre.  
Fenders are colored to match  
the hood and body in all types.  
Interior appointments are en-  
tirely new. Front and rear ap-  
pearance conforms with ad-  
vanced ideas of streamlining.

**HEALTH**  
by

HEALTH

You are beginning a new year  
and you have likely thought  
out your plans for the coming  
Did you consider your health in

Egbert and Bertie were cycl-  
in home from a party.  
"Quite a bit of a do, wasn't  
it?" said Egbert. "By the way,  
old fellow, where are we now?"  
"I think it must be Wembley,  
old chap."  
"Do tell. I thought it was  
Thursday."  
"Let's get off and have an-  
other, what?"

The New ...

making your plans. Did you  
stop to think that sickness would  
upset things, and that your  
health must be good if you are  
to carry out your plan?

We pride ourselves on our in-  
telligence, and yet when we re-  
alize that well over one-third of  
all the deaths that occur in Can-  
ada could be postponed, we may  
well wonder if we are not rather  
stupid lot in matters of health.

You are a lucky person in  
many ways. You are living at  
a time when so much more is  
known about disease that we  
no longer have to sit down and  
accept disease as inevitable. No  
indeed; we can do a great deal  
to prevent the occurrence of dis-  
ease and to raise the standard  
of personal health.

It is rather a terrible thought  
that so many die prematurely  
through their own ignorance or  
carelessness. Are you one of the  
who, through their own fault,  
will not enjoy the years of health  
which would be yours were  
your to make the necessary  
effort.

A great deal can be done for  
you, but no one can give you  
health because health depends  
upon your own habits of living  
more than anything else. You  
must eat the right kinds of food,  
no one can do this for you. You  
must sleep enough to get the  
rest your body needs. King or

peasant, rich or poor man, must  
live a healthy life if health is to  
be enjoyed.

Now, if your health is worth  
while looking after, and who  
will doubt that it is—then it  
seems more than reasonable to  
give some attention to it. Does  
it not seem a better idea to see  
the advice of your family  
doctor on how to keep well rather  
than wait until you are ill to  
ask his aid?

The periodic health examina-  
tion offers you a practical mean  
for keeping fit. At regular pe-  
riods, go to your family doctor  
and have him examine you. He  
will find, first of all, if the var-  
ious parts of your body are work-  
ing properly, and if they are  
not, he will prescribe what ever  
treatment is necessary to set  
matters right. Is this not a bet-  
ter plan than waiting for the  
condition to become so marked  
as to make it apparent to you?

Your doctor will consider your  
habits of living, and will guide  
you in any changes which may  
be necessary. You will enjoy more  
years of health if you make  
use of the periodic health exam-  
ination.

Question concerning health  
addressed to the Canadian Med-  
ical Association, 184 College St.,  
Toronto will be answered person-  
ally by letter.
